

# CHiME

SIT • SCAN • ORDER • ENJOY

Transform your guests' dining experience wherever, whenever.

Wi-Fi ENABLED

ir POWER

## CHARTER HOUSE INNOVATIONS MARKETING EXPERIENCE

CHiME is an innovative suite of infrared products reimagining the dining experience—and redefining exceptional customer service.

Utilizing our proprietary technologies, the CHiME suite makes the dining experience better for guests, team members, and management, from check-in and ordering to delivery and marketing messaging.

Each technology may be used alone or together to create the ultimate customer service experience.

Many CHiME products are powered by our POW(ir) puck infra-red wireless power technology. POW(ir) pucks utilize Wi-Charge technology, which can deliver over the air charging using patented infra-red technology. The pucks can deliver power up to a 30ft. range while adhering to the strictest safety regulations (approved by the FDA, UL and IEC worldwide).

The system is comprised of two parts: a wireless power transmitter (similar to a router but with infra-red technology) and a wireless power receiver that is embedded in the client device.
